Professional Summary

Computer Science graduate with Distinction and two software development co-op terms at **Sobeys**, experienced in enterprise applications, backend development, databases, APIs, testing, debugging, and **production support**. Skilled in **C#, Java, Python, JavaScript/TypeScript, .NET, SQL**, and REST APIs, with hands-on experience in **AWS, Azure, Docker, CI/CD**, microservices, distributed systems, and **AI/LLM integration**.

Skills

Programming Languages: C#, Java, Python, JavaScript, TypeScript, SQL, HTML, CSS, C/C++

Frameworks & Libraries: .NET, ASP.NET Core, EF Core, React, React Native, Node.js, Flask, Spring Boot, SQLAlchemy

Cloud & DevOps: AWS (EC2, S3, VPC, RDS), Azure, Docker, GitHub Actions, CI/CD, Git, Azure DevOps, Linux/Bash

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Firebase

Backend: REST APIs, API Integration, Microservices, ZeroMQ, Authentication, Session Management

Development: OOP, Data Structures & Algorithms, Unit Testing, Debugging, SDLC, Agile/Scrum, Code Reviews

Tools: Visual Studio, VS Code, GitHub, Jira, Confluence, Jupyter, Android Studio, Unity

Education

Bachelor of Computer Science (Distinction) | Dalhousie University | Sep 2022 – May 2026

GPA: 3.71/4.30 | Sexton Scholar (3 semesters) | **Certificate in Communication Technologies and Cyber Security**

Experience

Junior Software Developer Intern | Sobeys Inc. | Stellarton, NS | May 2025 – Aug 2025

- Developed and maintained internal enterprise applications using **C#, .NET, ASP.NET Core, Entity Framework Core, SQL Server, JavaScript, HTML**, and **CSS**.
- Built **full-stack** and **database-driven functionality** including authentication, user-specific data access, CRUD, file/image uploads, reporting, and interactive data visualizations.
- Modernized an internal registry-to-database utility from **.NET Framework 4.7.2** to **.NET 8**, integrating **SQL Server** configuration storage and resolving **SQL connectivity** and **SSL certificate issues**.
- Developed and tested **UPC/EAN barcode validation**, identification, and conversion functionality using **.NET** and **xUnit**.
- Investigated and resolved application, database, configuration, deployment, and connectivity issues while supporting existing enterprise systems.
- Collaborated with **developers** and **business stakeholders** in an **Agile environment** to understand requirements, troubleshoot issues, and deliver application improvements.

Junior Software Developer Intern | Sobeys Inc. | Stellarton, NS | May 2024 – Aug 2024

- Contributed to the **development** and maintenance of **internal web applications**, backend functionality, **API integrations**, and automated business processes.
 - Diagnosed **software defects** by analyzing application behavior, configurations, data, and business workflows.
 - Assisted with **application changes**, testing, deployment preparation, **production troubleshooting**, and **post-release support**.
 - Collaborated with developers and stakeholders through **Agile development**, **code reviews**, documentation and **deployments**.
-

Projects

(More on GitHub & Website)

Medibot – Emergency Room Prioritization System | Python, Flask, ZeroMQ, SQLAlchemy, LLM

- Developed a **distributed healthcare application** using **microservices**, **REST APIs**, **ZeroMQ messaging**, database-backed workflows, and **locally hosted LLM integration**.
- Implemented and debugged communication between independent services, including **real-time conflict notifications**.

Home Finance Tracker | C#, ASP.NET Core MVC, Entity Framework Core, SQL Server, JavaScript

- Built a **full-stack financial application** with **secure authentication**, per-user expense CRUD, bill-image uploads, stores, reporting, and **interactive charts**.
- Designed **relational data models** and implemented **session management**, authorization, and database-backed application workflows.

Cloud Deployment & Monitoring Pipeline | .NET, ASP.NET Core, Docker, GitHub Actions, Azure

- Developing an **ASP.NET Core project** focused on automated testing, **containerization**, **CI/CD**, **cloud deployment**, configuration, logging, and monitoring.
 - Structured the application with **separate API** and **automated test projects**, establishing a maintainable foundation for **containerized deployment** and **CI/CD workflows**.
-
